

United Way Jeopardy

INSTRUCTIONS

BEFORE THE PRESENTATION

1. Download the Jeopardy PowerPoint game and print the pdf instructions.
2. Print out 3 copies of the game board scoring page.
3. Distribute one game board scoring sheet to each team.

PLAYING THE GAME

1. Have everyone break up into 3 groups (have them number off, or just divide them up).
2. They will move together as a team and elect a spokesperson.
3. Instead of having contestants buzz in, you will start with group 1 and then move to each of the other 2 groups, as they choose a category and dollar amount.
4. Begin the Power Point slide show and click start game
5. Once the Jeopardy music and slide loads, you can move to the playing board by clicking the mouse one time.
7. If they answer that question correctly, have them mark a plus sign on their score card in that category. If they answer the question incorrectly, then they would put a negative sign in the box.
8. The team can also pass on the question (no points, negative or positive), and the next team can choose to answer the question (for points) or they can pass.
9. Remember not to reveal the answer before they have answered the question.
10. All answers must be in the form of a question.
11. Once you have gone through all of the questions and allocated points, have each team tally their score to come up with a dollar amount that they have earned.
12. You will then move into Final Jeopardy, giving each team about 30 seconds to come up with their answer for Final Jeopardy. Teams can choose to wager as much of their total as they wish.
13. The winner is the team with the most money after Final Jeopardy.

NOTE: There is one Daily Double, where the team can choose the amount they will wager.

Approximate game time: 20-25 minutes
